

below first 2 links cover 80% of the common issues

Background: side-effect of company security defaults

– disabling will not revert the settings, so the first 2 links need to be applied

(1) Admincenter way to do SmtpClientAuthenticationDisabled \$false

- <https://github.com/jahube/SMTP/blob/main/1-Enable-SMTP-AUTH.png>
- Powershell way

Set-CASMailbox -Identity *AFFECTED@USER.com* -SmtpClientAuthenticationDisabled \$false

<https://docs.microsoft.com/en-us/exchange/clients-and-mobile-in-exchange-online/authenticated-client-smtp-submission>

(2) OAuth exception to allow basic auth for SMTP

- <https://github.com/jahube/SMTP/blob/main/0-allow-basic-auth.png>
- the other 20% - **doesn't work**
shared mailbox (needs login + license)
delegate sending without permissions – (sendas denied exception)
MFA
Invalid settings
- PDF with all steps
<https://github.com/jahube/SMTP/blob/main/2-Client-submission-Smtp-Relay.pdf>
- **Sending Scripts** (5x) [apply separately]
<https://github.com/jahube/SMTP/blob/main/3-send-script.ps1>
